

Dual Wireless Charge Station

with 2 Rechargeable Batteries for Wii Remote™

Wi-WDDC

Can charge with
Wii MotionPlus adapter
connected and protective
silicone skin case on

two Wii Remote-molded
rechargeable batteries included

Recharge two Nintendo® Wii Remotes simultaneously with the Dual Touch Charge Station from CTA Digital. This charge station contains a two-space cradle that allows you to charge and rest two remotes with its protective silicone sleeve still on.

Utilizing a new induction charging technology you will be able to lay the remotes on the charge base, instead of connecting them to small metal contact strips found in your average remote charger. Included are two sets of Wii Remote™ molded rechargeable 1800mAh batteries that will start charging upon touching the charge base. The Dual Touch Charge Station is powered by a USB cable that attaches from the AC adaptor connection (located on the back of the device) to a USB port on the Wii Console or on a computer. With the molded batteries attached, MotionPlus™ adapter connected and silicone skin case on, your Wii Remote will easily charge by simply laying it down on this charger.

Features:

- Wireless induction charge technology, charges without connecting metal contact strips
- Charges one or two Wii Remotes with or without a silicone sleeve
- Two LED charge indicator lights
- On/Off switch
- Wii MotionPlus™ compatible

Pack includes:

- Two 1800mAh Rechargeable Batteries
- DC-USB Cable
- One base Station to recharge one or two Nintendo® Wii Remotes

Specification:

- Capacity: 1800 mAh
- Game play after charge: approximately 13-20 hours
- Charging time: 5-6 hours

Contactless charging!
Easily charges your Wii Remote™
with the silicone sleeve and MotionPlus™
